

Hi Shelley,

Here is some general information on the Venus, Laser and Viveve treatment. I am also sending before and afters of one of our clients here at Chadalin and a PDF of our logo. Please let me know if there is anything else you need to get started.

Erin

You have done the hard work now let us help with the rewards. Chadalin Medi-spa would like to offer all drop zone clients 15% off our cellulite reduction and skin tightening services. Venus Legacy, infra-red laser skin tightening and our newest service viveve will be included in your special price. All consults are free and no obligation with our very own Dr.V.

Venus Legacy™ is a highly advanced non-invasive medical device that effectively resolves challenging face and body aesthetic needs, such as non-surgical body contouring\*, cellulite reduction, skin tightening\*, and wrinkle reduction.

Treatments are comfortable with no downtime for patients and use technology that is safe for all skin types.

Treatments are comfortable with no downtime and safe for all skin types. Venus Legacy™ is powered by proprietary (MP)<sup>2</sup> technology (a combination of Multi-Polar Radio Frequency and Pulsed Electro Magnetic Fields) and features cutting-edge VariPulse™ technology.

Attain firmer, fitter looking skin with SharpLight's leading infra-red laser treatments.

SharpLight's cutting-edge med-aesthetic systems offer complete solutions to the many seeking tighter, younger looking skin without undergoing surgery. SharpLight's progressive technologies are helping patients defy time by reducing and, in many cases, eliminating the associated signs of aging, including loose or sagging skin, folds, creases and wrinkles, in a non-invasive and effective way.

The skin tightening treatments apply a combination of three of SharpLight's advanced technologies, including Intense Pulsed Light (IPL), Radio Frequency (RF)\* and Infrared (IR) technologies. These powerful skin-tightening machines and lasers achieve results in just a few relatively short pain-free treatment sessions which fill in lax, sagging or wrinkled skin. The new collagen, which results in the tightened skin can last years,

We are very excited to offer you our newest service invested into women's health. Viveve is the only device backed by a multicenter, double blinded, placebo controlled study proving it's efficacy for vaginal laxity and the associated issues that come along with it.

This treatment is comfortable and requires no downtime and the results in collagen development can be noticed fully at about 3 months post-treatment with peak effect at about 6 months. Book in with our Doctor to learn more about this amazing service.

Current client of Chadalin Medi-spa.

Results are based on 8 Venus Legacy treatments and this photo was taken a month before the final treatment results are expected.
